CAREER OBJECTIVE

Dedicated Cybersecurity student at Alexandria National University with a strong foundation in penetration testing, ethical hacking, and network defense. Proficient in Python scripting, Linux administration, and utilizing industry-standard tools like Wireshark, Metasploit, and Fortinet. Proven track record of hands-on training through prestigious initiatives such as DEPI, NTI, and ITI. Seeking a professional role to leverage analytical skills in detecting and mitigating security threats.

EDUCATION

Alexandria National University (Expected 2027)

Bachelor's Degree in Cybersecurity | GPA: 3.3 (Very Good)

- Relevant Coursework: Network Security, Cryptography, Operating Systems, Database Security.

INTERNSHIPS OR WORK EXPERIENCE

Penetration Tester Trainee — Digital Egypt Pioneers Initiative (Nov 20 - Present)

- Engaged in an intensive professional training program focused on advanced cybersecurity methodologies.
- Performed Vulnerability Assessments and Penetration Testing in simulated real-world environments.
- Mastered networking fundamentals and Linux security configurations.
- Collaborated on capstone projects involving complex security audits.

Network Security Summer Intern — National Telecommunication (Jul 2025 – Aug 2025)

- Configured and managed firewalls to enhance network perimeter security.
- Conducted deep packet analysis using Wireshark to identify potential network threats.
- Implemented IDS/IPS solutions and practiced core networking concepts (TCP/IP, OSI Model).
- Executed basic penetration tests to evaluate network resilience.

Cybersecurity Academy Trainee — MCIT / NTRA / NTI / EG-CERT (Aug 2025)

- Completed advanced modules in Cloud Security Auditing and Log Analysis.
- Conducted Threat Hunting operations and designed security awareness campaigns.
- Utilized tools such as Nessus, Burp Suite, Splunk, and GoPhish for comprehensive evaluations.

Mobile App Development Intern — Information Technology Institute (Sep 2025- Oct 2025)

- Developed cross-platform mobile applications using Flutter and Dart during a 60-hour intensive camp.
 - Applied UI/UX principles to create intuitive and user-friendly mobile interfaces.
 - Managed the full app development lifecycle from architecture design to deployment.
-

TECHNICAL AND LANGUAGE SKILLS

Cybersecurity:	Penetration Testing, Ethical Hacking, Vulnerability Assessment, Network Security, Firewall Management, Threat Hunting.
Networking:	CCNA Concepts, Routing & Switching, Network Troubleshooting, Packet Analysis (Wireshark), Cisco IOS.
Operating Systems:	Red Hat Enterprise Linux (RHEL), Kali Linux, Windows Server Administration.
Programming:	Python (Scripting & Automation), Dart (Flutter), SQL.
Tools & Platforms:	Nmap, Metasploit, Burp Suite, Nessus, Splunk, Fortinet, VirtualBox, VMware.
Language Skills:	Arabic: Native English: Professional Working Proficiency

PROJECTS

Advanced Cryptography Tool

- Developed a comprehensive security tool in Python implementing multiple encryption algorithms (S-DES, Vigenère, Playfair, etc.).
 - Designed a user-friendly interface for encrypting and decrypting sensitive data.
 - Achieved full marks for technical complexity and code efficiency.
-

EXTRACURRICULAR ACTIVITIES

Certifications & Training

- CompTIA Network+ & Linux+
- Certified Network Security Practitioner (CNSP)
- Python Programming – MaharaTech
- Ethical Hacking – MaharaTech
- Bug Bounty & Web Hacking – Udemy
- Deep Learning Foundations – NVIDIA

Soft Skills

- Communication & Teamwork
- Problem Solving & Critical Thinking
- Time Management & Leadership
- Adaptability & Work Ethic
